

Mitsuba V-Belts

NANO FORCE

The World's Most Innovative Wrapped V-Belt

15% Improve on the Slippage

Belt Life Increase by 100%

Higher Horsepower Rating

15% Less Elongation

Extreme Durability

High Efficiency

Mitsuba V-Belts

NANO FORCE

The World's Most Innovative Wrapped V-Belt

The Nano Force Advantage

Wrapped V-Belt Performance Under Rigorous Stress Tests

At Mitsuba Belts, we strive to make the very best power transmission belts. That is why we developed Nano Force technology; the world's most advanced rubber compound. Over extended periods of use, traditional wrapped v-belts suffer deformation, misalignment and, ultimately, failure. With Nano Force technology, we deploy a specialized mixture of nano-fibers into our core compound which significantly improves dimensional strength of the rubber. The result is a longer lasting belt and optimized performance for your most demanding applications.

Beginning in 2018, all Mitsuba Wrapped V-Belts will incorporate this ground breaking technology at no additional cost to you.
